

Aravo for

ESG

Build an ethical supply chain, comply with global regulatory requirements, mitigate your risk exposure, and align with corporate environmental, social, and governance (ESG) initiatives. Aravo's fully-integrated, cloud-based platform uses intelligent automation for assessing, managing, and monitoring ESG practices across your extended enterprise.

Benefits

Build a supply chain that reflects your brands values

- Leverage purchasing power to make a stronger, longer-lasting impact on people, communities, the environment, and your organization
- Achieve a sustainability vision leveraging supply chain & third parties
- Provide complete visibility into your ESG program

Maximize your ROI

- Contribute to net revenue growth with ESG supply chain initiatives
- Mitigate potential fines and penalties
- Generate cost-savings by automating the thousands of ESG interactions with your extended enterprise

Comply with complex regulatory requirements

- Hold third parties accountable and identify non-compliant vendors with scope and regulatory-based assessments
- Create a consistent, controlled, transparent process to meet the demands of global regulations
- Respond quickly to evolving regulatory requirements

Mitigate risks in your extended enterprise

- Identify unethical or irresponsible practices and proactively manage risk
- Mitigate risk exposure using issues and corrective actions
- Standard integration with Risk Intelligence providers to augment third-party and supply chain assessments

In today's global impact of ESG, Aravo is one of the few solutions solving the most complex organizational challenges in the extended enterprise.

Pre-configured Assessments with Automated Review and Approval

Integrated Risk Intelligence with ESG Data Providers

Action Plans to Manage and Prevent Risks

ESG Dashboards and Reports

Features

Centralizes all your third-party information into a single inventory to standardize and automate ESG due-diligence processes.

Review ESG metrics and centralize reporting of risk and compliance performance.

Screen third parties and suppliers with risk intelligence data providers, including EcoVadis, providing data such as financial information, adverse media, social media monitoring, and business sustainability ratings.

Automated continuous monitoring of third parties and suppliers.

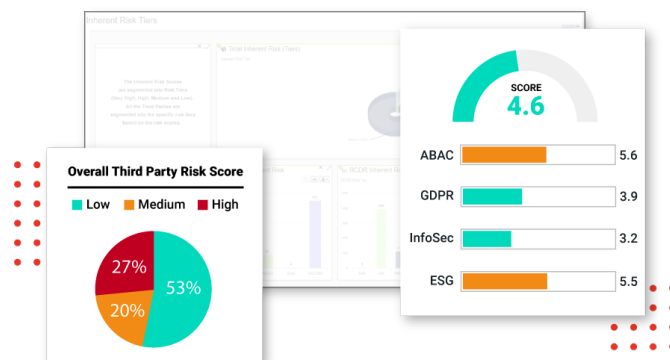

Extend risk assessment to additional areas, including anti-corruption, data privacy, and information security.

Enforce controls to ensure third parties are held compliant with anti-slavery, conflict minerals, EH&S, diversity, and other ESG regulations.

Demonstrate compliance program effectiveness to regulators and auditors.

Pre-configured for multiple ESG frameworks, including SASB, GRI, CDP, TCFD, and the UK Modern Slavery Act.

Artificial intelligence/machine learning (AI/ML) decision support for onboarding/off-boarding as well as the option to deploy AI for other decision support, automation, or prediction use cases.
