

The Aravo Academy

The Aravo Academy is a resource-rich, online training portal for customers. It's designed to make training available to our customers at the point of need: anytime, anywhere. The content included in the Academy is intended to supplement the in-person training you receive from our Aravo experts and will continue to evolve over time to align with our customers' needs.

A few of the immediate benefits:

Learn Aravo Anytime

We want to make sure our valued customers have access to Aravo training material any time they need. While the content won't take the place of our Aravo experts, it can help fill in gaps, provide reminders on how to execute certain processes, and allow you to learn more about our software on your own schedule.

Learn Aravo Anywhere

Now that we have training content available in the Aravo Academy, you can learn from your phone or tablet. Of course, we do suggest using your computer whenever possible - this will give you the best user experience. Plus, if you have multiple screens, you can easily pull up the training and Aravo side-by-side to learn as you go.

The Aravo Academy will also allow you to:

- Earn badges as you complete courses
- Benefit from best practices and tips & tricks
- Find answers to frequently asked questions
- And eventually... become an Aravo Certified User

Aravo Academy Access

Access to the Aravo Academy is provided via **Customer Success Team**.

Aravo Academy must be used by individually named learners, meaning Aravo will not accept distribution lists. Access can be transferred if Aravo is provided with a documented change of staff. Contact the [Aravo Academy Team](#) for assistance with adding users to the Aravo Academy.

The Aravo Academy allows learners to access self-paced Aravo Fundamentals training courses, which set the stage for learning the basics of the Aravo platform. New courses and content will be added on a quarterly basis.
